Subject: Re: Advancements-Keeping Track?

Susan,

If you or someone in your Pack has an account with Compuserve you can download any of the following found in the Outdoors Activities Forum under Scouting:

PackTracker
TroopTracker
ShipTracker
PostTracker
OATracker
CubSys
ScoutSys
VentSys
CubMate
ScoutMate

As you can see there are three different tracking programs for Packs. You can look at the description before downloading and see whether it more current than what you have, but I think you find that all were uploaded in the last couple of years.

Subject: Troop Tracking

I am in the process of developing a new tracking program for Troops. I would like to gather any information on special programs that you and your troops may have that are unique but may be useful to other units. For example, in our troop, we split fund raiser profits between the boys participating and the unit treasury. To do this, we have developed a "checking account" for each of the boys in the unit. They may use the funds for purchase of uniforms, cost of events, etc., things directly related to Scouting. I plan on incorporating this as an added feature in this new program. Also, if you have any unique data that you need that is not captured by any of the other programs out there and not on the Scout record sheet, please let me

know. A brief explanation of these and what they are used for would be appreciated. Also, on the unique programs you may have for your unit, please give me all the details that you can if you would like me to try to program it! Thanks and I hope to hear from all of you in the near future.
